

“...we chose the
most challenging mission:
to offer legal services
to lawyers.”

The aim of Studio Legale Sutti's presence in London is that of offering a full range of prompt and efficient on-site legal services regarding Italy and the Balkans to English lawyers.

In the UK we should like to be viewed as a barrister-like practice - fully backed by SLS's other operations to which we are connected through a high-speed intranet - with the purpose of serving British lawyers and corporate counsel for their clients' and employers' needs related to Italy and South-Eastern Europe.

Thus, our London office usually does not deal directly with final clients, and targets exclusively law firms, patent and trademark agents, and in-house lawyers, to whom it delivers specialist advice as well as representation in our local civil, criminal and administrative courts, thanks to the combined resources and know-how of one of the largest Italian independent firms.
